Universal Dr_Copy

Universal Dr_Copy for MetaTrader 5. It copies forex positions and orders from any accounts. This program also has the ability to send screenshots to the Telegram bot.

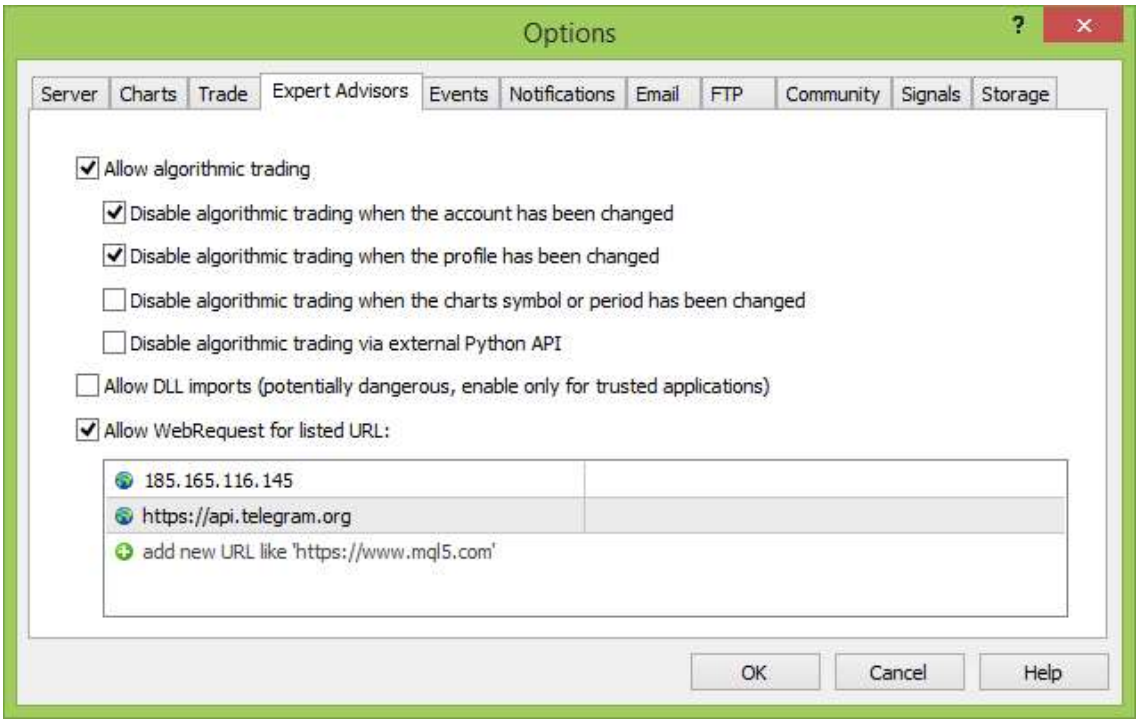
MT5→MT5

Instructions for installing and using the Universal Dr_copy:

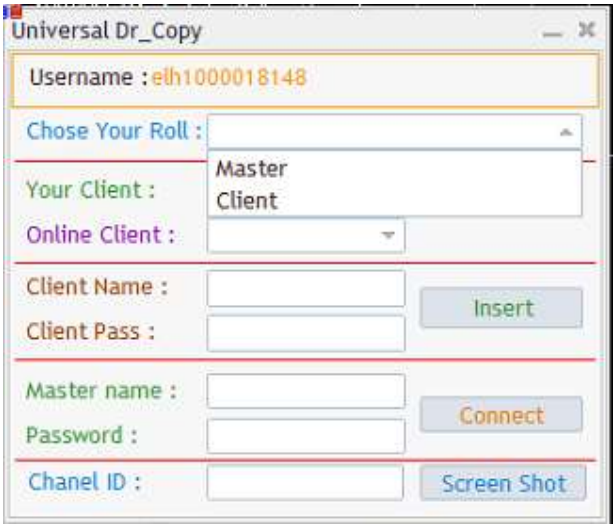
Step1: Add the following link and IP to the path below

185.165.116.145
https://api.telegram.org

MT5/Tools/Options/Expert Advisors



Step2: Run the **Universal Dr_Copy** program and set master mode or client mode on the opened panel



A: Master Setup

1-Set mode parameter to **Master** mode

2-Set the client account (insert or delete them)

3-If you want to use the ability to send screenshots in the Telegram channel First, you add the @Farsimallbot to your channel as an admin then Set the channel id and send a screen shot.
